

# DATA ANALYST BOOTCAMP

Learn, Evolve, Innovate, and become a global talent in demand

## CAPSTONE PROJECT COHORT 9.0

### About Project

#### Nyc Collisions

Motor vehicle collisions reported by the New York City Police Department from January-August 2020. Each record represents an individual collision, including the date, time and location of the accident (borough, zip code, street name, latitude/longitude), vehicles and victims involved, and contributing factors.

To analyze the dataset and provide answers to the questions listed below:

#### Question 1.

Compare the % of total accidents by month. Do you notice any seasonal patterns?

#### Question 2.

Break down accident frequency by day of week and hour of day. Based on this data, when do accidents occur most frequently?

#### Question 3.

On which particular street were the most accidents reported? What does that represent as a % of all reported accidents?

#### Question 4.

What was the most common contributing factor for the accidents reported in this sample (based on Vehicle 1)? What about fatal accidents specifically?

NB: Generate your own insights to add to this.

***NB: After completing your analysis, you are to make a documentation on Github and paste the link to***

- ***Your Github documentation on Linkedin***
- ***Also, a picture of your dashboard on Linkedin (ensure to tag DigitaleyDive on LinkedIn)***
- ***Then go ahead to submit using the link below***

*Submission link:*

<https://docs.google.com/forms/d/e/1FAIpQLScq4SnpjLrMLjSs09DiGkVDJGzlniYaiwP7lfneoVfeY16JaA/viewform>

*Find the the link to the shark attack dataset in below:*

[https://docs.google.com/spreadsheets/d/1huf7nbHNZdzc4N6QUvURxeWU-G27KSYU3KI3v\\_heXgw/edit#gid=1166525029](https://docs.google.com/spreadsheets/d/1huf7nbHNZdzc4N6QUvURxeWU-G27KSYU3KI3v_heXgw/edit#gid=1166525029)

***DEADLINE FOR SUBMISSION: 5th January, 2026***
